

Model SA Airless Palletized Striper

Palletized stripers will fit in a pickup truck or on the back of a flatbed truck. These units can have either fixed carriages to be operated from the cab of the truck, or steerable carriages to be used as a two-man operation.

This Model Features:

Lightweight Design—1,260 lbs. allows plenty of payload

20hp Kohler Engine

Pressure-compensating piston hydraulic pump

100% waterborne paint compatibility

8.6 GPM airless paint pump

Complete drum-to-gun recirculate system

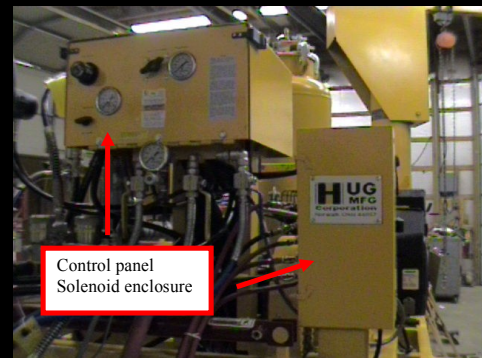

350 lb. capacity bead system (500 lb. optional)

Gun carriage transport position

Lifting eyes at all four corners

Model SA
Airless Palletized Striper

Weight: 1,260 lbs.
Paint Capacity: 60-120 lbs
Bead Capacity: 350-500 lbs.
Operators Required: 1 or 2

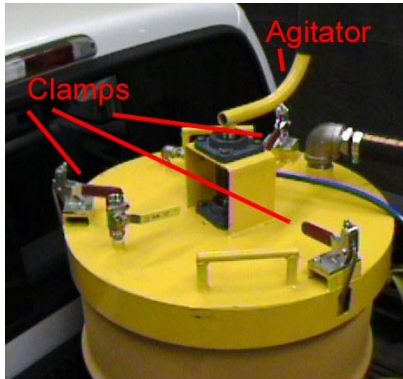

The control panel is mounted at the rear/center of the striper to allow easy access from either side of the machine. Paint and bead pressure adjustments can be made on the fly. Solenoids are mounted in a protective enclosure.

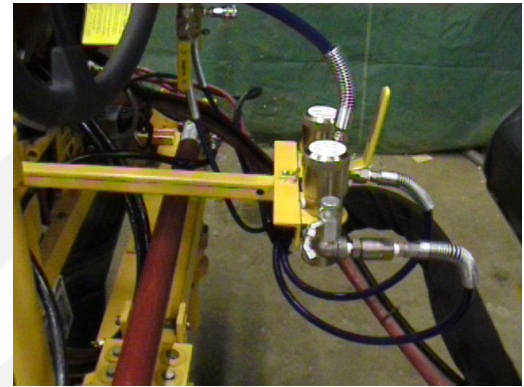

Well balanced layout of the machine assures an even load

Model SA Airless Palletized Striper

The paint pump siphons paint directly from the drum. The **stainless steel** lid assembly has a **gasket** and **clamps** to assure a tight seal. A **hand agitator** is standard but a **hydraulic motor** is available.

Also, (as seen on the right) the paint filters can be extended past the rear of the truck for easy cleaning with no drip on the machine.

The paint pump piston is covered to keep out dirt and contaminants. The filters are mounted at the rear of the machine to help keep it clean during filter service.

Solenoids are mounted in a protective enclosure to keep them out of the weather.
