

Scaled Down with Diesel Compressor (Air-Spray)

The scaled down striper is designed with simplicity in mind. The tanks are small and are loaded through the two-inch fill ports in the lids using a diaphragm pump.

- Kaeser 92 CFM diesel rotary screw air compressor
- 1" Stainless steel diaphragm load pump (hand held, load through top)
- Two 60 gallon stainless steel paint tanks
- 750 LB capacity bead tank
- Two hydraulic steerable paint gun carriages
- Two paint and bead guns
- Hydraulic agitator motors
- Cone platform
- Two identical BD-305 skip timers
- Tube style paint filters
- 30 x 60 arrow-board
- Solenoid enclosures
- Operator accessible paint manifold with shut-off valves
- All stainless steel plumbing
- Center mounted mechanical line pointer with pneumatic lift
- Panel mounted controls in operator console
